To: The Commission

FCC - MAIL ROOM

COMMENTS OF A-Sonic Guard, Incorporated

Security holds FCC radio licenses governed by Part 90 and is therefore an interested party to and files the following comments in, PR Docket No. 92-235. These comments will be directed primarily at the Central Station operations currently authorized under Part 90.75.

This company owns and operates a Safecom radio system manufactured and sold by Senses International of San Jose, California. Our Safecom system is fully UL-Listed for Life-Safety applications and uses advanced technology to put up to 2,500 radio units on a single simplex or duplex 12.5 KHz narrowband channel. As a fully supervised two-way system, it need not transmit a message more than once in most cases.

We believe that the Safecom system meets or greatly exceeds the intent of this proceeding with respect to spectrum efficiency and channel loading, and should become the standard by which other alarm radio systems are measured. This company wishes to go on record as supporting the comments filed by Senses International in this proceeding.

Respectfully submitted,

Janet L. O'Connor Pres
